

The three pdf files show the proposed Methuen Rotary Interchange Reconstruction project in three parts. For those experiencing trouble loading the maps or otherwise having issues with the visual, we have also provided a narrative pdf of the maps.

The Overall pdf provides an overview of the project highlighting the major changes and new elements.

Route 110/113 and I-93 plans are detailed plans that are best viewed by zooming in to see details not shown on the overall plan. These plans are presented in two pdfs.

- The Route 110/113 pdf shows the east-west Route 110/113 corridor from approximately Albert Street to Burnham Road/Green Street and Forest Street. This pdf is 13.4 mb and takes a little time to load due to the level of detail.
- The I-93 pdf shows the north-south Interstate 93 corridor from the Merrimack River to Forest Street.
